Office Action Summary

Art Unit: 2124

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 12-22 are, drawn to a **gold code generator**, classified in class 708, subclass 250+.
 - II. Claims 7-11 are, drawn to a system comprising at least one **reconfigurable chip** implementing a **gold code generator**, classified in class 717, subclass 140+.
2. The inventions are distinct, each from the other because of the following reasons:

Each group of claims is directed to a separate invention. It is noted that the groups maybe belong to a system. However, this is not sufficient to prevent a restriction requirement.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because subcombination is not essential to combination, i.e., independent claim 7 [of Group II] does NOT recite the detail features of independent claim 1 [of Group I]. The subcombination has separate utility such as a gold code generator.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2124

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
